Extended biography

Olufela "Lu" Fagbure is the Founder & Director of IT Custom Solution LLC, a multi-practice technology firm serving government and commercial buyers.

Lu's background spans more than a decade in enterprise technology management, IT consulting, systems engineering, and asset management. He brought that perspective into IT Custom Solution, where his work now connects procurement, technology delivery, responsible automation, strategic teaming, talent, and Winrove software.

IT Custom Solution is an NYC-certified Minority Business Enterprise and an NMSDC-certified Minority Business Enterprise through the NY & NJ MSDC. The firm is active in SAM.gov under UEI PR9KWJPM4JU9 and CAGE 91CE1. Its SBA 8(a) application was submitted in 2026. Named public-sector delivery includes competitively awarded technology-supply work for City Utilities of Springfield, Missouri and Rensselaer County, New York.

Winrove is IT Custom Solution's software platform. The firm is consolidating contracting, skills assessment, hiring and onboarding into one product. The transition is in progress; available workflows and access are confirmed for each release.

Across services and products, the operating standard is consistent: understand the requirement, make a bounded promise, preserve the evidence, and deliver in a way the buyer can verify.

Lu studied at the University of Alberta and is based in New York.

Speaker bio

Olufela "Lu" Fagbure is the Founder & Director of IT Custom Solution LLC and an operator working where procurement, technology delivery, and responsible automation meet. His background spans more than a decade in enterprise technology and IT consulting. ITC is NYC MBE and NMSDC MBE certified, active in SAM.gov, and has completed named public-sector technology-supply engagements in Missouri and New York. Lu offers practical sessions on procurement literacy, supplier-diversity conversion, accountable workflows, and the operating systems a lean firm needs to compete and deliver credibly.

Podcast bio

Lu Fagbure is the Founder & Director of IT Custom Solution, a New York technology firm serving government and commercial buyers. His background spans more than a decade in enterprise technology and IT consulting. At ITC, he learned procurement from the operator's side: registration, certification, bidding, losing, winning, and delivery. He talks about making a small firm easier to buy from, using software without removing accountability, and turning supplier-diversity access into useful buyer relationships.
